***ACKERMAN SECURITY SYSTEMS IN AN INDUSTRY FIRST  
PARTNERS WITH DICE DISASTER RECOVERY CENTER SERVICES***

Ackerman Security Systems continues its innovative leadership role by partnering with DICE Corporation's Disaster Recovery Services ensuring back-up monitoring in the event of a catastrophic emergency situation.

Ackerman is taking a lead role in something the entire alarm industry should recognize and take part in ...ensuring its clients safety during a crisis said Cliff Dice, CEO of DICE Corporation.

Bruce Turry, President of Ackerman, noted, "Ackerman has always lead the way in creating unique services like Disaster Recovery monitoring for its clients." Ackerman is the only company in the industry to provide its clients with a Seconds Count Guarantee®, guaranteeing its monitoring response time. They also offer an exclusive \$1500.00 Insurance Deductible Program as part of the value added services to their clients, saving them hundreds of dollars on homeowner premiums annually.

"We feel like this says something about our confidence level in the equipment we install, and the people monitoring and servicing the homes and businesses we protect" Turry said.

Ackerman is Atlanta's largest local security company providing commercial and residential security services since 1967 to over 24,000 clients in the Atlanta and North Georgia areas.

With over 100 employees and its company owned, local U.L. Certified Central Station, Ackerman installs, services and monitors security, fire, closed circuit television and access control systems. For more information on Ackerman Security, please visit [www.ackermansecurity.com](http://www.ackermansecurity.com).

DICE Corporation specializes in creating the most customizable, integrated, and scalable software solutions for the security and integration industries. Founded in 1985, DICE Corporation is privately held and operates on an international level with its clients in six continents. DICE is headquartered in Bay City, Michigan and is the largest and most advanced software provider dominating the commercial and dealer alarm markets.
